

## **BIOMAX INFORMATICS awarded ISO 9001 and ISO 27001 certification for quality management and information security**

### **International standards recognize company's commitment to best practice and information security**

PLANEGG, Germany — (25 September 2017) — Biomax Informatics AG, a leading provider of knowledge management solutions, today announced that it was awarded ISO 9001:2015 and ISO 27001:2013 certifications for best practice in quality management and information security management, respectively. The company earned the prestigious accreditation after nearly a year of rigorous, independent assessment.

ISO accreditation demonstrates that Biomax has adopted best practice in quality management and adheres to the strictest international standards in developing and maintaining its software offerings, which include the BioXM™ Knowledge Management Environment and other products.

ISO 9001 certification guarantees that Biomax meets the criteria of a quality management system based on principles that include a strong customer focus, dedication to constant improvement, a top management system, and consistent delivery of client requirements.

ISO 27001 certification, the most stringent certification for information security controls, validates that Biomax has implemented information security controls and other forms of risk management to prevent and defend against potential data system vulnerabilities. The ISO 27001 standard ensures secure management of customers' information, intellectual property, and third-party information by establishing methodologies and continuously meeting key objectives for implementing information security.

Biomax CEO, Dr. Klaus Heumann, commented: "We strive to achieve excellence in all of our operations at Biomax. ISO certification is an important milestone in our effort to deliver extra levels of service and security assurances that our clients have come to expect."

#### **About Biomax**

[Biomax](#) provides computational solutions for better decision making and knowledge management in the life sciences. They help customers generate value by integrating information from proprietary and public resources to enable a knowledge-based approach to developing innovative life science products. Biomax's worldwide customer community includes companies and research organizations that are successful in healthcare, drug discovery, diagnostics, fine chemicals, food and plant production, and synthetic biology.
